Current Year 7 students Top Tips

I enjoy the lessons that we didn't have in primary school such as experiments in science and subjects like engineering and cooking.

Hello what I liked about year 7 was learning new things and getting better at learning. It was quite scary making friends because I didn't really know anyone but I managed to make loads of good friends. Advice for future year 7's is don't be scared it will be just the same as primary but bigger and the learning will be Awesome! 😊

When I came to this school, I liked the teachers supporting us and giving us advice. First, it was scary to make new friends but later it turned out that it wasn't that scary at all because I had made new friends. 😊
My advice for the future year 7 is to be confident, hardworking and do not be scared.
Best wishes Future year7 ☐
Thank you

When I first came to CoDA, I was worried that I would get lost - it's so much bigger than my primary. In the first few days, I got lost once or twice, but there was always someone to show me where my class was. After that, I learnt where everything was, and I now no longer have to worry about being lost. It helps if you go to each lesson with one of your class mates who knows where things are so that they can show you and you can become comfortable with the layout.
