Latest Post 16 Updates – Current Apprenticeship Vacancies

Toyota Partner Company Apprenticeship *More Vacancies are Open* for Applications

Toyota have released more new Maintenance Engineering Apprenticeship opportunities with some of their partner companies that are currently open for a September 2021 start for:

- Radius Systems
- Marks and Spencer
- Mitie Technical Services
- Futaba
- SSI Schaefer

How does the partnership work?

Our partner company apprenticeships mean employment is with a chosen partner company (above) from the very beginning ('home company'). However, training takes place within our Apprentice Development Centre, here on site at Toyota, Burnaston.

Our partner companies are a range of engineering firms from around the local area, who are looking for Maintenance Apprentices to join their business.

The apprenticeship is 44 months long, and apprentices would gain a level 3 maintenance engineering qualification at the end of this.

The first two years of the apprenticeship will be taught at Toyota with some placement weeks at the home company.

The final two years of the apprenticeship is mainly based at the home company with some occasional training at Toyota.

To be eligible to apply you must possess or be anticipating a minimum of 4 GCSE passes at grade 4/C or above, including Maths, Science and English. **Closing date for applications is 11/04/21**

To apply, please visit <https://recruitment.toyotauk.com/apprenticeships/external-partner-engineering-apprenticeships.html>

Toyota Open Day

Toyota will be holding an open day on site at Toyota on **8th April 2021**. This will provide a chance to walk around our training academy and meet our trainers, as well as to meet some of our partner companies. This is a chance to understand more about the apprenticeship and ask any questions you may have!

Booking will be essential, and taken via their website (link above)

Please note, the open day will be fully COVID secure, and comply with all COVID regulations. Visitors will attend and go around the academy in household groups only.

WEBS Practical Trades Apprenticeships

If you would like to gain work experience, earn money and start a career once you have finished school, an apprenticeship with WEBS could be the right path for you.

If you are leaving school this year, you could start your apprenticeship from July 2021. You can contact WEBS to apply now so you can get a head start in finding an apprenticeship course that would suit you.

If you are interested in finding out more about how apprenticeship training works, please get in contact with WEBS and a member of the team will be happy to answer any questions you have!

If you are looking to get into a practical trade, WEBS offer apprenticeship courses in Furniture Manufacturing, Wood Machining, Sewing and Upholstery. We also offer Customer Service, Warehousing and Trade Supplier apprenticeships where you can learn all aspects of the roles, gaining experience in the work place whilst completing your apprenticeship training at the same time.

With apprenticeships, no experience in the trade area is needed and all aspects of the job role will be taught to learners through on and off the job training. If you do not have a Grade 4 or equivalent in Maths and English, this just means that part of the apprenticeship training would involve working towards your Functional Skills qualification in these areas.

If you are enthusiastic about learning new skills and kick starting your career, contact WEBS today!
