

## ***Improving the life chances of all students***

### **City of Derby Academy GCSE (and equivalent) Examination Results Press Release 2022**

We are incredibly proud of all our Year 11 students who have faced the challenges and uncertainties of the last two years brought upon us by the Coronavirus pandemic.

The qualifications that our students have achieved will enable them to access their preferred pathways in September, whether that be further education, training or employment, and to realise their potential and ambitions as young adults.

These examination results - the first official results for two years - are testament to our students' hard work and resilience as well as the support and commitment of our staff in helping to realise our academy's vision: to improve the life chances of all our students.

I am absolutely delighted to announce that our results are comparable to the last set of official results in 2019 which illustrates that, despite the disruption of the last two years, we have maintained our high and improving standards, a fact that was confirmed by the Ofsted inspection earlier this year.

Indeed, our average points score per student is higher than in 2019, and I am especially pleased that nearly a quarter of our students achieved a grade 5 in both English and Mathematics (an increase of 6% since 2019). Moreover, both of these headline results, and our Ebacc average points score, exceed the FFT targets set for the school. In addition, 45 students (nearly 23% of our cohort) achieved *at least* one grade 7.

Whilst there are many success stories, I would like to highlight the following students for their phenomenal performances:

Jaskiren K – seven subjects at grade 7 or higher, including three grade 9s.

Ella D – seven subjects at grade 7 or higher, including two grade 9s.

Surpreet K – six subjects at grade 7 or higher, including three grade 9s.

Michela B – six subjects at grade 7 or higher, including a double grade 9 in Science.

Tyler G - three subjects at grade 7 or higher, including a grade 9 in Mathematics.

Gurditt S, Gurleen K, Leah E and Michael W - five subjects at grade 7 or higher.

Aleksandra G, Jack D-W, Lewis S and Yara S - four subjects at grade 7 or higher.

Amarachi O, Eryk L, Gurveer K, Ryan G - three subjects at grade 7 or higher.

Sahilpreet S and Rashmeet K – exceeding their targets in every subject by between 2 and 4 grades.

Well done to all of our Year 11 students. We are very proud of you and it has been a privilege to have you as part of the CODA community. All the very best for the future.

Adrian Harding
